

REPORT ON INDUSTRY TALK (PROJECT MANAGEMENT)

GROUP MEMBERS :

DAYANG FARAH FARZANA BINTI ABANG IDHAM (A23CS0071)

FARRA NURZAHIN BINTI ZAHARIL ANUAR (A23CS0079)

HARINI A/P SANGARAN (A23CS0081)

SAFIYA NURSYAHADAH BINTI MASNOOR (A23CS0176)

BIODATA

Mr. Ts. Abdul Alim Abdul Mutallib works at Thetha Technology Telecommunication as a Product Innovation and Modernization Lead. He graduated from UTM in 2015. His first career at Intel Corporation in Penang, where he focused on technology analysis in Failure Analysis Technology Department

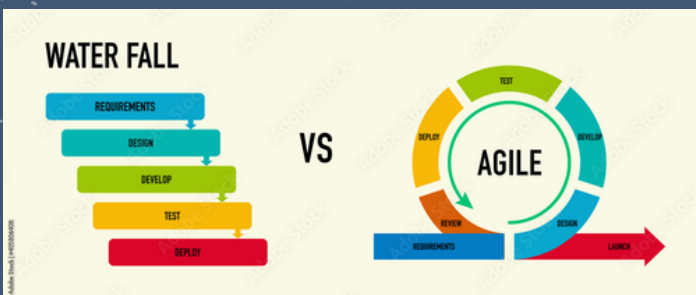

PROJECT

Ts. Abdul Alim shared his project from the latest company.

SAKUPAY is an eWallet for daily purchases, with its hassle-free purchasing experience and smooth financial transfers between SAKUPAY members

METHODOLOGIES

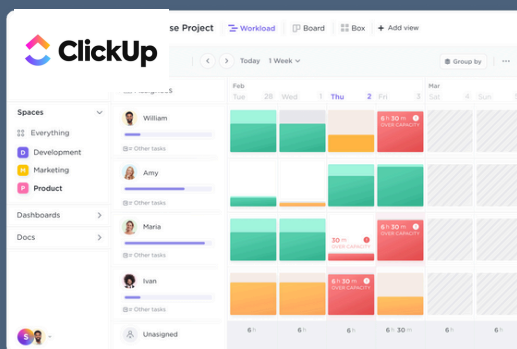

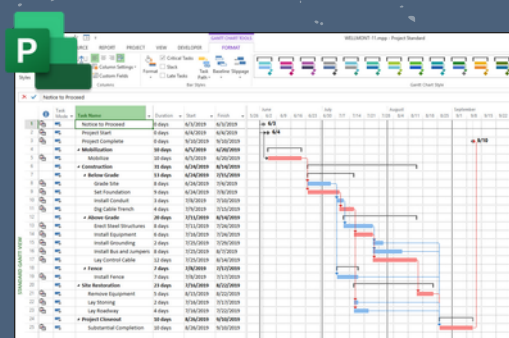

Mr. Ts. Abdul Alim Abdul Mutallib also explained on the methodologies that are being used in industries which are waterfall methodology and agile methodology. As per the image, waterfall methodology starts with planning, analysis, design, development, testing and finally maintenance. Agile methodology goes through the same phases as well but agile methodology occurs in a loop whereas waterfall methodology is more towards one-time flow. Comparatively, agile methodology gives opportunity to industries to continuously improve and produce better results.

SHARED EXPERIENCES

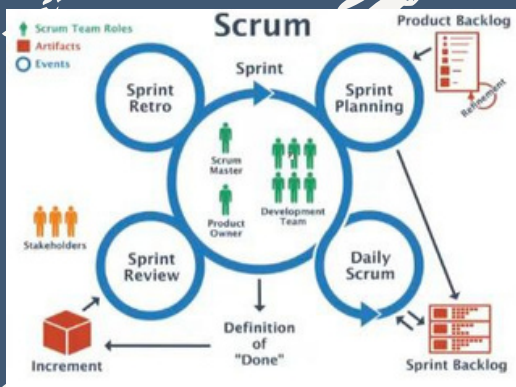

His first designated work in Intel Corporation is testing i9 process which is basically root forcing i9 processor. Ts. Abdul Alim was culture shocked because it was his first experience after graduation and he hadn't been taught how to execute effective project management in the first place.

According to Ts. Abdul Alim, having excellent communication skills is essential in this field since without them, we wouldn't be able to accurately understand the client's needs. Ts. Abdul Alim revealed that when working with Intel, waterfall methodology was used and acknowledged several shortcomings. Waterfall is fantastic, but using outdated methodology in this age of rapidly advancing technology will not advance us.

APPS THAT AID PROJECT MANAGEMENT

Mr. Ts. Abdul Alim Abdul Mutallib mentioned that Microsoft Project and Clickup are great apps to begin with for project management as it has Gantt chart to track the duration of project, the date line and also lists out the tasks that has to be done. Tasks for each colleague can also be easily assigned in these apps so that each person can view the part that has to be done by them.

Ts. Dr. Alim mentioned on how agile methodology require an iterative development to achieve perfection in user experience, interface, functionality and security. Agile framework & methodology like Scrum, Lean and XP are the top 3s. He explained on Scrum's methodology that includes Scrum Planning, which is the distribution of tasks is going on here, Daily Scrum, a 15-minute meeting to know project progression, Scrum Review to re-evaluate each problem of team members themselves and lastly, Scrum Retrospective which an analysis to show what is good and bad for the project. Ts. Abdul Alim also mentioned in QnA session on how he handled conflict between team members by using Daily Scrum method.

Farra - "The industry talk gives me a peek into how things work in the industry especially as a Computer Science student. Ts. Abdul Alim's journey shows the importance of communication skills. The SAKUPAY project example illustrates the use of apps like Clickup for task tracking. Learning about agile frameworks like Scrum was interesting, especially how the handle conflicts during daily scrum meetings. Overall, the talk provides a sneak prak into my future assignments and career in the industry, helping me prepare for what's ahead."

Harini - ""The industrial talk given by Mr. Abdul Alim was brief and informative which was very insightful. He emphasised on how tasks are done in industries and how it is monitored. For example, his company uses Github and Microsoft Teams to track their work and also most importantly assign and organize the tasks according to each person. He also recommended us to familiarise ourselves with project management apps like Microsoft Project so that doesn't only help us with tracking our progress but also in the long run, preparing for the industry. I genuinely think Mr. Abdul's speech was very informative yet simple which makes me eager to learn more from him."

REFLECTION

Dayang - "After hearing this industrial talk, i realized that some methodologies arent suitable for all situations. To illustrate, waterfall methodology can be useless for certain situation mentioned by the speaker where he experienced itself and detected some flaws. Thus, I aspire to dig more into methodologies so that i can choose a correct methodology to solve situations effectively in the future. The speaker mentioned that communication skill is fundamental in acquiring exact client request. This adds on to my personal goal into improving my communication skill in order to create a better future. I am motivated to consistently looking for ways to improve and using active communicaton techniques after seeing how successful the speaker is."

Safiya - "During the industry talk by Ts Abdul Alim, I learned about the two main methodologies used in industries: waterfall and agile. Agile methodology stands out for its iterative approach, giving industries the chance to improve and achieve better results over time. Then, he emphasized the crucial role of the Software Development Life Cycle not only in my final year project but also in real-world industry projects, highlighting its importance for effective planning, execution, and overall project success. Additionally, Dr Aryati stressed the effectiveness of analogy presentations in project management discussions, as they not only make the content more relatable but also distinguish one's presentation style, creating a memorable impact on the audience and stakeholders."
